

Ahmed Mostafa

Penetration Tester

Giza, Egypt | +20 1018679337 | ahmed.m.pentester@gmail.com | [LinkedIn](#) | [GitHub](#) | [YouTube](#)

PROFESSIONAL SUMMARY

Penetration Tester and Computer Engineering student focused on web application and network penetration testing. Hands-on experience with reconnaissance, vulnerability validation, exploitation, reporting, and remediation guidance using tools such as Burp Suite, Nmap, Metasploit, Wireshark, and SQLMap. Ranked in the top 3% on TryHackMe, active on Hack The Box, Mentor Intern at ADA, and cybersecurity content creator at pwn_sec. Also building foundational exposure to Active Directory and mobile application security.

TECHNICAL SKILLS

Core Penetration Testing: Web Application Testing, Network Penetration Testing, OWASP Top 10, CVE Analysis, Exploitation, Post-Exploitation, Vulnerability Validation

Security Tools: Burp Suite, Nmap, Metasploit, Nessus, Wireshark, SQLMap, Nikto, Hydra

Reporting and Analysis: Vulnerability Assessment, Threat Modeling, Risk Analysis, Data Flow Mapping, CVSS, Security Documentation, Remediation Planning

Networking: Routing and Switching, VLANs, OSPF, NAT, ACLs, HSRP, VPN, Network Hardening

Foundational Exposure: Active Directory basics, Mobile Application Security basics

Programming: Bash Scripting, Python basics, JavaScript, Java, SQL, C++

Operating Systems: Kali Linux, Ubuntu, Windows, Windows Server

PROFESSIONAL EXPERIENCE

Mentor Intern - ADA | September 2026 - Present

- Support learners with cybersecurity fundamentals, lab practice, technical guidance, and structured learning paths.
- Explain offensive security concepts in a practical way, helping learners connect tools, methodology, and reporting.

Cybersecurity Content Creator - pwn_sec | May 2025 - Present

- Create educational cybersecurity content focused on offensive security, web security, CTF labs, and beginner-friendly technical explanations.
- Translate hands-on lab experience into clear walkthroughs and learning material for early cybersecurity learners.

Cybersecurity Trainee - WE Innovate | Aug 2025

- Performed web application penetration testing following OWASP Top 10 methodology, identifying SQL injection, XSS, IDOR, and broken authentication vulnerabilities.
- Conducted network penetration testing in simulated environments, including enumeration, service analysis, exploitation, and evidence-based reporting.
- Practiced introductory Active Directory and mobile application security testing concepts as part of broader training.
- Delivered structured security reports with CVSS severity ratings, root cause analysis, evidence, impact, and prioritized remediation recommendations.

Network and Security Intern - DEPI | Apr 2024 - Oct 2024

- Designed and deployed enterprise network topologies with VLANs, OSPF dynamic routing, and HSRP high-availability failover.
- Hardened network infrastructure by implementing ACLs, Port Security, and NAT policies to enforce least-privilege access.
- Performed network security audits, mapped data flows, and documented misconfigurations to reduce the attack surface.

IEEE Cybersecurity Vice Head | Jan 2026 - Present

- Help organize cybersecurity activities, technical sessions, and student learning initiatives focused on practical security skills.

PROJECTS AND SECURITY LABS

- Metasploitable Exploitation Report: documented enumeration, vulnerable service discovery, exploitation, post-exploitation findings, and remediation steps.
- Kioptrix Level 1 Report: investigated Apache/mod_ssl and Samba attack paths, privilege escalation, impact, and hardening recommendations.
- Root Me NoSQL Injection Writeup: explained authentication logic testing and NoSQL injection technique used to discover a hidden user.
- Online Delivery System: built a full-stack delivery application using React and Java with authentication, order flow, and backend business logic.

CERTIFICATIONS AND ACHIEVEMENTS

- eCPPT - eLearnSecurity Certified Professional Penetration Tester, In Progress
- eWAPTX - eLearnSecurity Web Application Penetration Tester eXtreme
- Top 3% globally on TryHackMe | Active CTF competitor on Hack The Box
- CEH - Certified Ethical Hacker, MaharaTech
- CCNP ENCOR - Cisco Certified Network Professional Enterprise Core
- CCNA - Cisco Certified Network Associate

EDUCATION

B.Sc. Computer Engineering - Modern Academy for Engineering and Technology | Expected Jul 2027

GPA: 3.44 / 4.0 | Relevant Coursework: Data Structures and Algorithms, Database Management, Software Engineering
